

Practical Management of Acne in Patients With IBD on JAK Inhibitors

Please join our discussion to better understand the management of acne in patients with IBD on JAK inhibitors. Together we will discuss the incidence of JAKi-induced acne as well as the potential mechanism behind its development, highlight practical management strategies, and review patient cases.

Monday, May 5, 2025
6:30-7:30PM PT

Manchester Grand Hyatt San Diego
Grand Hall C
